

of the implementation of a GDP compliant QA-System for pharmaceutical transports at

Attrans North Africa BV

Attrans North Africa has implemented a quality assurance system effective as of May 15, 2018 which covers the basic requirements of the GDP "Guidelines on Good Distribution Practice of Medicinal Products for Human Use of 5th November 2013" (2013/C 343/01). The company does not act as a wholesaler.

Within the scope of the implementation of the system all employees of Attrans North Africa BV, who are working on GDP relevant tasks, were trained regarding the content of GDP guidelines and to their special tasks based on the requirements of the GDP.

Thereby Attrans North Africa BV meets the requirements of the GDP for the transport of pharmaceutical products.

The suitability for the transport of pharmaceutical products has to be checked through periodical, annual self-inspections as well as the GDP compliance. This check needs to be documented and verified.
